

Akela Aegis - Smart Safety Marshal

AI-Powered Drone & Surveillance Service for Ports and Critical Maritime Infrastructure

What You Get

Autonomous Drone-in-a-Box systems with advanced multi-sensor payloads (optical, thermal, hyperspectral)

Real-time AI for PPE compliance, hazard detection, and instant on-the-spot audio/visual alerts

Intrusion detection, perimeter security, and early environmental monitoring (oil spills & debris)

Unified dashboard with live feeds, risk heatmaps, and seamless system integration

Full insurance, maintenance, spares, and rapid replacement

Advantages

Always the latest technology with automatic upgrades

Predictable annual subscription – zero capital investment

Full risk transfer and operational readiness guaranteed

You retain full ownership and control of operations

Continuous Intelligent Protection with Zero Capital Investment

Akela delivers a complete Technology-as-a-Service (TaaS) solution — an advanced, always-up-to-date drone and AI integrated safety, security, and environmental monitoring system designed for harsh marine and port environments.

No hardware purchase. No maintenance burden. No technology obsolescence.

You receive a fully managed service where Akela takes full responsibility for hardware, software, upgrades, maintenance, insurance, and 24/7 operational readiness.

Akela Aegis turns passive monitoring into active, predictive safety & security intelligence.
